Objective To be able to use my learned as well as my inherent skills as a manager of business and of people: I have a desire to remain in a medically related service or business where I can use my many years of experience to enhance the quality and continued growth of my place of employment. My primary goal at my place of employment is identical to my goal in life; to care for and about those people I am blessed to work for, work with and have as associates.

Interests Family, especially my Grandchildren, are my passion. I love to read, both fiction and history, and I like to browse for antiques. Gardening is my newest interest and the discovery of growing things.
