

A UNIQUE HYBRID PROGRAM THAT BLENDS ONLINE  
COURSEWORK WITH IN-PERSON CLINICAL TRAINING  
502.221.7765

## TRANSITION YOUR TNAs to CNAs

CNAonline.com partnered with the American Health Care Association to help create the Temporary Nurse Assistant online course to help facilities meet their workforce crisis during COVID-19. Now is the time to prepare your Temporary Nurse Aides to become Certified Nurse Aides and recruit new CNA students. We can help you take control of building your own clinical workforce with a facility based CNA training program. It is obvious that the traditional ways of training CNAs in a classroom will need to change due to social distancing. Let CNAonline.com help you address COVID-19 related training issues.

Our unique hybrid program provides flexibility, quality, and convenience for students and providers, fully preparing students for certification. The in-person clinical and skills training will be hosted in your organization's facility where you can mandate the inclusion of COVID-19 requirements and other requirements unique to your facility.

### Key Features & Benefits

Accessible  
24/7 on laptops,  
tablets, and  
smartphones

- Utilizes the latest version of AHCA's renowned **How To Be A Nurse Assistant** curriculum.
