2021 Updates:

Since the onset of COVID-19, rules and regulations have changed over and over. Keeping abreast of the latest changes has been daunting. We will review the regulations as they currently are at this time. The accuracy of ICD-10-CM coding remains very important as many decisions are being made based on the data being reported to various agencies. Data is not just for billing but is also used for: MDS, QI/QM, Nursing Home Compare, registries, Epidemiology and Federal policy making.

Program Topics to be covered:

- ICD-10-CM coding with a review of common errors made
- PDPM – lessons learned with COVID-19, Non-Therapy Ancillary codes, and Speech comorbidity code review
- Coding Queries
- Colorado HIM Regulations
- 1135 Waivers
- PASRR
- State Survey and review of Discharge Requirements
- HIPAA Privacy & Security
- Release of Information
